

DICE THRONE ADVENTURES UNCHAINED

v1.0 - This rulebook is a living document. Download the latest version at DTArules.dicethrone.com

PREVIOUS EXPERIENCE & ADDITIONAL COMPONENTS REQUIRED!

Playing this expansion requires each player to have a Hero from any collection of **Dice Throne**, a copy of **Dice Throne Adventures**, and existing knowledge of how to play **Dice Throne**. **DO NOT CONTINUE UNTIL YOU HAVE PLAYED AT LEAST ONE STANDARD CAMPAIGN OF DICE THRONE ADVENTURES.**

NATE CHATELLIER
MANNY TREMBLEY
GAVAN BROWN

WELCOME BACK HERO!

DICE THRONE ADVENTURES AND HEROES REQUIRED!

THE ADVENTURE CONTINUES...

You and your team of battle-hardened Heroes have continued to fight the Mad King across the Crimson Sands. Growing weary of your constant meddling, he has loosened the chains on the Vault Witch to hunt you down!

This expansion includes an alternate Boss called the Vault Witch. By collecting and using Witch Keys, you can choose to face her instead of the normal Fallen Bosses during Boss Battle Scenarios.

Two new game modes, **One-Shot Adventure** and **Minion Rush**, provide brand new ways to play Dice Throne Adventures in a short amount of time. There is also a new One-Shot Loot Table to be used in these game modes.

1 One-Shot Loot Table

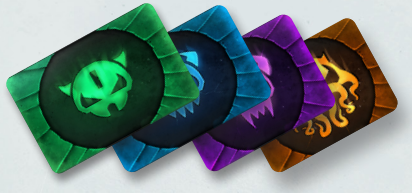

37 Loot cards: 9 Common, 10 Rare, 9 Epic, and 9 Legendary

2 Boss Leaflets

3 One-Shot Maps
Double-sided

12 Minion cards
2 level I, 3 level II,
3 level III, and 4 level IV

3 Witch Key cards

1 Boss Board

1 Boss Scenario card

40 Boss cards

THE VAULT WITCH

HOW TO COLLECT WITCH KEYS

Every time your party **successfully completes a scenario**, your team will gain 1 Witch Key. Collect this key at the start of the Scenario Conclusion step (see DTA Rulebook, pg. 12)

- Your party may have a maximum of 3 Witch Keys at any given time.
- We also suggest that you note how many Witch Keys you have on your team's Campaign Scoring sheet.

HOW TO FIGHT THE VAULT WITCH

Each time your party would normally advance to a Boss Battle (i.e. Scenario 2, 4, or 6), you may choose to spend a Witch Key to battle the Vault Witch instead.

- When you use a Witch Key, return one Key to the Card Caddy.

Retrieve the Vault Witch Scenario card and make the adjustments to the original Boss' Scenario card. Then set up the Vault Witch Boss the same as a normal Boss Battle in Dice Throne Adventures.

DEFEATING THE VAULT WITCH

If you defeat the Vault Witch, you should count the win as successfully completing the original Boss Battle (i.e. Scenario 2, 4, or 6).

- The Vault Witch cannot be faced once you advance past Scenario 6.
- You may only defeat the Vault Witch **ONCE** during a single campaign.
- Once you have defeated the Vault Witch, any held Witch Keys, as well as any Witch Keys gained when completing future scenarios, may be converted into either of the following:
  - 5 Gold (if you completed a Portal Crawl).
  - 1 additional Boss Loot 5 / 6 / 7 (if you completed a Boss Battle).

DEFEATED BY THE VAULT WITCH

If you have any remaining Witch Keys, you can choose to face her again at the current scenario level. Otherwise, you must face the original Fallen Boss listed for the scenario.

HERO STARTING HEALTH
All Heroes share a Health dial. Start it at 50 Health.

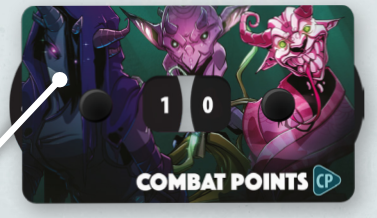

BOSS BATTLE SCENARIO CARD
With the Vault Witch adjustments, she will have 85 Health and 10CP Upgrade CP.

KING'S HAND TOKENS
The Vault Witch starts with 5 *King's Hand* tokens.
Note: The "successful roll values" is different.

Example: For a 3-Hero game when advancing to Scenario 2, she will be adjusted to the following amounts:

1. Boss Health: 85
2. Upgrade CP: 10CP
3. *King's Hand* tokens: 5
4. Starting CP: 2CP

ENEMY DIAL (CP SIDE)

ENEMY DIAL (HEALTH SIDE)

ONE-SHOT ADVENTURE

Love Dice Throne Adventures, but don't have time for a campaign? Try the **One-Shot Adventure** game mode for 1-4 players. If you can survive a wave of Minions and defeat the Boss at the end, you win! Check your score to see how you did, and try to beat your previous One-Shot Adventure Score each time you play.

GAME AREA SETUP

Same as Campaign setup (see DTA Rulebook, pg. 5) with the following exceptions:

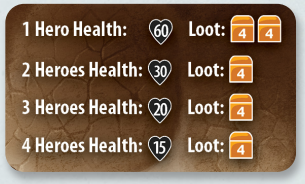

1. Use the new One-Shot Loot Table instead of the original Loot Table.
2. Choose one of the six One-Shot Maps instead of a Scenario card.

PLAYER SETUP

Same as Portal Crawl setup (see DTA Rulebook, pg. 6) with the following exceptions:

1. You will not use the Gold Dial.
2. After determining the Start Player, place only that Hero's standee on the START room of the Map (i.e. this Hero Standee represents all Heroes in the party, and you will all move together as one).
3. Have each Hero set their starting Health based upon the amount shown on the Hero Setup section (see Example 1).
4. Gain Loot Chest(s) based upon the Hero Setup section (see Example 1).
   - To increase difficulty, try starting without any Loot Chests, and/or increasing the Boss' starting Health!
   - For an easier time, try increasing your starting Health and/or giving yourself an extra starting Loot Chest!

Example 1: In a 3-Hero game, each Hero would set their Health to 20. Then, your team will gain one Loot Chest 4 (all Heroes will roll their Loot die, just like in normal Dice Throne Adventures).

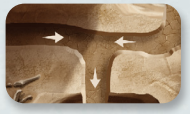

ON YOUR TURN (MINIONS)

Same as Portal Crawl: Minion Battle (see DTA Rulebook, pg. 8-9).
Below are the typical steps with any exceptions noted:

- **Spend *Salves*** (optional): You may choose to spend *Salves* to Heal 6 on your own Health dial (may spend multiple).
  - *Salves* can also be used to revive fallen teammates to 1 Health but may not be used to revive yourself.
  - **Remember:** You can Heal up to a maximum of 10 above starting Health.

OTHER GAME MODES

- **Move**: If the party is not *engaged* with a Minion, you move the party forward along the One-Shot Map.
  - If you pass over a Loot Chest symbol, all Heroes roll their Loot die.
  - If you pass over a *Salve* symbol, one Hero gains a *Salve*.
  - You cannot "backtrack" and fight Minions behind you (see example below).
  - **Important:** When paths converge, you must follow the arrows. You cannot move against the flow of the path.

- **Engage:** After moving into a new Minion space, draw and reveal a new Minion card of the corresponding level you landed on. Then *engage* the Minion, performing the normal Minion setup steps (see DTA Rulebook, pg. 8) .
  - **Important:** All Heroes are considered *engaged* with the Minion.
- **Fight:** When the party is *engaged* with a Minion, follow the Portal Crawl Hero Step and Minion Step as normal, including any Minions with ***First Strike*** (see DTA Rulebook, pg. 8-9).
- **End of Turn:** Follow the End of Turn rules for Portal Crawls as normal (see DTA Rulebook, pg. 8-9).

END OF TURN

If the Minion is still alive, the next Hero will take their turn fighting the same Minion.

IF YOU DEFEAT THE MINION

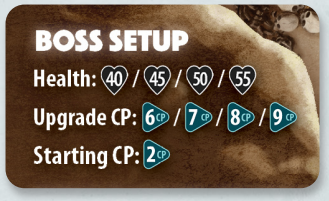

When a Minion is defeated, all Heroes will roll their Loot die and receive a reward from the new One-Shot Loot Table based on their roll.

- **Note:** Any Gold rewards received from Minions are ignored.
- **NEW:** Loot Cards are added directly into your hand! See the Glossary (pg. 13) for more details.

BOSS SETUP

When the party reaches the end of the One-Shot Map, it's time to face the Boss! Setup is the same as a Boss Battle Scenario (see DTA Rulebook, pg. 10-11) with the following exceptions:

- Choose any Boss from Dice Throne Adventures.
  - **Note:** Harder Bosses are worth more points at the end of the game.
- Keep all Heroes' remaining Health separate. You will not have a shared Health Dial like in a normal Boss Battle.
- Keep all of your cards, status effects, Hero Upgrade cards on your Hero Board, etc.
- Setup the Boss following the rules on the One-Shot Map. The card will list the starting Health, Upgrade CP, Starting CP, and number of *King's Hand* tokens to use.

- The player whose turn it was when the party reached the Boss is the first to act.

ONE-SHOT ADVENTURE (CONT)

ON YOUR TURN (BOSS BATTLE)

Same as Boss Battle turn order and Boss steps (see DTA Rulebook, pg. 11).

- **Spend *Salves*** (optional): You may choose to spend *Salves* to Heal 6 on your own Health dial (may spend multiple).
  - *Salves* can also be used to revive fallen teammates to 1 Health, but may not be used to revive yourself.
  - **NEW:** Both effects can be used while either fighting Minions or when battling the Boss.

END OF BATTLE

If any Hero's Health was reduced to 0 and could not be revived from a teammate's *Salve*, **your party loses**!

- **Note:** A *Salve* may not be used if a Boss activates their *Ultimate*!

If you defeat the Boss, **your party wins!** Proceed to One-Shot Adventure Scoring.

ONE-SHOT ADVENTURE SCORING

Score your **One-Shot Adventure** as follows:

1. Add together the remaining Health of each Hero.
2. Add 6 points for each remaining *Salve*.
3. Add the Boss Bonus Points (below).

BOSS BONUS POINTS

Minion Level	Points Earned
Fallen Barbarian	15
Fallen Gunslinger	15
Fallen Monk	15
The Vault Witch	20
The Mad King	25

Per the example, you would calculate your One-Shot Map Score as follows:

18 Health + 6 Health = 24 points
One remaining Salve = 6 points
Defeating the Fallen Monk = 15 points

Final Score of 45 points!

ONE-SHOT ADVENTURE - RULES CLARIFICATIONS

- You do not skip your *Income Phase* on your first turn.
- You cannot use your Mythic Ability cards.
- Status effects stay on the Hero Board even if a Minion is defeated.
- Gold has no effect in this game mode. If you draw a Loot card that would cause you to gain Gold, choose one of the other two Loot cards.

OTHER GAME MODES

MINION RUSH

SUMMARY

Minion Rush is a 1-player game mode. Test your ability to survive a wave of Minions, battling until you defeat all Minions or your Health is reduced to 0.

How to set-up:

GAME AREA SETUP

1. Set aside one random Level I Minion.
2. Place two random Level IV Minions face-down (see above).
3. Combine all remaining Level I/II/III Minions into a single deck.
4. Shuffle the entire deck and create the above card tree with the shuffled deck, placing each Minion card face-down in the order above from 1 to 10.
5. Once all cards have been placed, collect the previously set aside Level I Minion and place it on the green space (see above).
6. Place the One-Shot Loot Table, Dice Throne Adventures Token Tray, and the back of the Dice Throne Adventures rulebook nearby.

Set-up example:

HERO SETUP

1. Select a Dice Throne Hero.
2. Set your starting Health to 30.
3. All other standard setup rules apply (i.e. start the game with 2CP, draw 4, etc).

MINION RUSH (CONT)

ON YOUR TURN

- **Spend *Salves*** (optional): You may choose to spend *Salves* to Heal 6 (may spend multiple).
  - **Note:** You can only gain *Salves* from certain Loot cards. *Salves* cannot be used to revive yourself!
- **Reveal new Minions**: You must first defeat the Level I Minion (green box).
  - Once it has been defeated, you must choose to progress left or right.
  - Once you have chosen a path, you cannot switch to the other until all Minions have been defeated on a single path.
- You cannot progress to the next Minion unless all Minions laying on top of it are defeated.
- If you are not *engaged* with a Minion, you must reveal the next Minion on the same path and become *engaged* with it.
- **Engage:** After revealing the new Minion card, perform the normal Minion setup steps (see DTA Rulebook, pg. 8).
- **Fight:** While *engaged* with a Minion, follow the normal Portal Crawl Hero Step and Minion Step, including any Minions with ***First Strike*** (see DTA Rulebook, pg. 8-9).
- **End of Turn:** Follow the End of Turn rules for Portal Crawls as normal (see DTA Rulebook, pg. 9).

IF YOU DEFEAT THE MINION

When a Minion is defeated, roll your Loot die and receive a reward from the new One-Shot Loot Table based on your roll.

- **NEW:** Loot Cards are added directly to your hand! See Glossary (pg. 12) for more details.

Note: Any Gold rewards received from Minions are ignored.

Set the defeated Minion card aside to be scored at the Minion Rush conclusion.

CONCLUSION

If your Health is reduced to 0, or if you defeat all Minions, your Rush has ended.

For each Minion you defeated, receive points equal to their difficulty level. Additionally, add your Health total as bonus points to your score.

OTHER GAME MODES

POINTS

Minion Level	Points
Level I Minion	1
Level II Minion	2
Level III Minion	3
Level IV Minion	6

For example, if you were only able to defeat 2 of each Level I/II/III Minions, you would calculate your points as follows:

1 x 2 + 2 x 2 + 3 x 2 = 12 points

KING'S HAND TOKENS

- A successful *King's Hand* roll value is 4-6.
- All other *King's Hand* rules are unchanged (see DTA rulebook, pg. 9).

MINION RUSH - RULES CLARIFICATIONS

- You do not skip your *Income Phase* on your first turn.
- You cannot use your Mythic Ability cards.
- Whenever you reveal a SOLO symbol, discard this Minion and replace it with a new random Minion of the same level.
- Status effects stay on the Hero Board even if a Minion is defeated.
- Gold has no effect in this game mode. If you draw a Loot card that would cause you to gain Gold, choose one of the other two Loot cards.

GLOSSARY

ONE-SHOT LOOT TABLE

- The One-Shot Loot Table rewards are similar to ones on the original Dice Throne Adventures Loot Table (see DTA rulebook, pg. 12) with the following exceptions:

Gain Loot Cards: If you roll a Loot Card reward, perform the following steps:

1. Deal the top 3 cards of the respective Loot deck faceup.
   - If you are playing solo, immediately replace any cards with the SOLO symbol.
2. Choose one of these cards and add it directly into your hand.
   - **Important:** Ignore any swap icons. You can have multiple cards with the same name, but different rarity, in your hand at the same time.
3. Place the other two cards on the bottom of its matching Loot Card deck.

Loot Table Reminders:

1. You can choose to discard a Loot Card from your hand at any time to draw a replacement card from your Deck.
2. When earning a Loot Chest for defeating a Minion, the Loot die should be rolled at the end of the Active Player's turn (after the Discard Phase).

NEW KEYWORDS AND PHRASES

Ghost Equipment: There is no limit to the number of Ghost Equipment cards you can have in play and they do not count against your normal Equipment limit of two.

"Can only be played immediately after discarding a card": This effect is triggered by all forms of discarding cards, including:

- a Hero ability effect, card effect, or status effect
- an Environment Tile
- discarding a Loot card in order to draw a replacement card from your deck
- playing a card with the phrase "Discard 1. Then..." .

You can play multiple Action cards with this phrase when a single card has been discarded. Note that 'selling' cards is not the same as 'discarding' cards.

"Discard 1. Then...": These Action cards can only be played if you also discard a card of your choice (as an additional cost of the card).

Losing Health: When a card instructs you or an opponent to "lose 'X' Health," lower the relevant Health dial by the specified amount. Lost Health does not count as damage (i.e. it cannot be prevented or avoided in any way).

Witch Key : Spent to fight the Vault Witch instead of the original Fallen Boss. One Witch Key is received each time you successfully complete a scenario. See Vault Witch section (pg. 4) for additional rules.

DICE THRONE ADVENTURES RULE CHANGES

- *Salve* Stack Limit is 15.
